

How To Guide

Create a Student User Account (1 of 11)

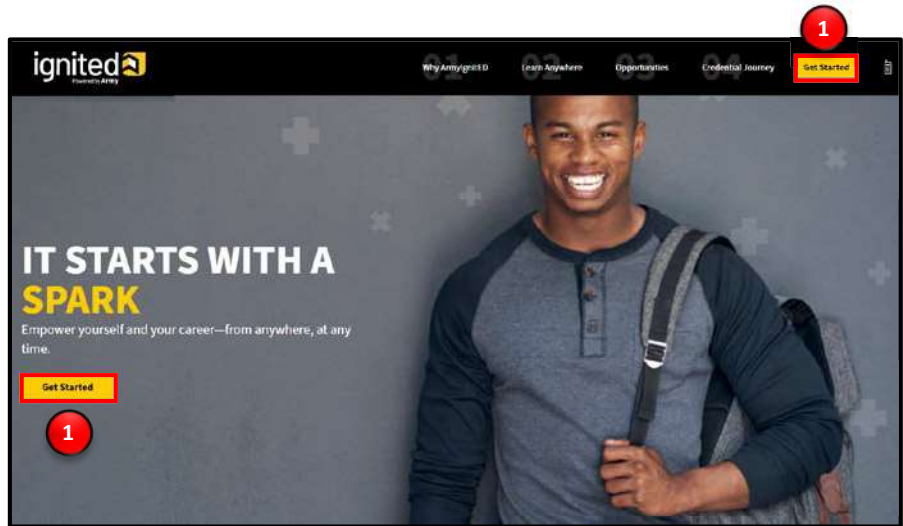

Purpose

This guide highlights the steps to create a Student User Account. This process includes creating both a Login.gov and an ArmyIgnitED account. The Student will need either their mobile phone or Government ID to complete this registration.

- If you **do not** have a Login.gov account proceed to Step 1.
- If you **have an existing** Login.gov account, but need to update it to with your .mil address, sign in to your login.gov account and proceed to Step 15:
- If you **have an existing** Login.gov account, and it is already setup with your .mil account, proceed to Step 20:

Steps to Create an Student User Account

1. Go to www.ArmyIgnitED.com and click **Get Started**.
2. Click **Create an account** to start the process of creating your Login.gov account.
3. Enter the **.mil email address** that you want associated with the account then, click **Submit**.

ArmyIgnitED is using login.gov to allow you to sign in to your account safely and securely.

You can close this window if you're done.

Steps to Create a Student User Account

Note: You will be presented with a completion screen informing you that a confirmation link has been sent to the .mil email address you entered in the previous step.

Clicking **Resend** will resend the confirmation link to the .mil email address you listed.

Clicking **use a different email address** will return to the previous page and allow you to re-enter a different email address if needed.

4. Log in to the .mil email account you requested the confirmation code to be sent to and find your confirmation email.
5. Click **Confirm email address** and you will be automatically redirected back to the Login.gov account creation process.

6. Create a strong password and click **continue**.

Password Safety Tips: The longer and more unusual the password, the harder it is to guess. Avoid using common phrases and repeating passwords from other online accounts (banks, email address, social media, etc.).

Note: Clicking **Show Password** will allow you to view the characters in the password entry field instead of asterisks. Please be cautious and use good judgement when using this feature as it takes away a level of privacy when creating the password.

You will now need to select a second layer of security so only you can sign in to your account.

Note: Government employees should select the Government Employee ID option and non-government employees should select the phone option.

7. Select **Government employee ID**.
8. Click **Continue**.

Authentication method setup

Add a second layer of security so only you can sign in to your account.

Select an option to secure your account:

- Authentication application**
Get codes from an app on your phone, computer, or tablet. Recommended because it is harder to intercept than texts or phone calls.

MORE SECURE

- Security key**
Use a security key that you have. It's a physical device that you plug in or that is built in to your computer or phone (it often looks like a USB flash drive). Recommended because it is more phishing resistant.

MORE SECURE

- Phone**
Get security codes by text message (SMS) or phone call

SECURE

- Government employee ID**
Insert your government or military PIV or CAC card and enter your PIN

SECURE

- Backup codes**
We'll give you 10 codes. You can use backup codes as your only authentication method, but it is the least recommended method since notes can get lost. Keep them in a safe place.

9. Set up your PIV/CAC as a two-factor authorization method so that you can use it to sign in.
 - Give it a nickname. If you add more than one PIV/CAC, you'll know which one's which.
 - Insert your PIV/CAC into your card reader.
 - Add Your PIV/CAC. You'll need to choose a certificate (the right one likely has your name in it) and enter your PIN (your PIN was created when you set up your PIV/CAC).
10. Click **Add PIV/CAC Card**.
11. Select the certificate that corresponds with your PIV/CAC.

Note: There are typically 3 certificates that you are able to choose from: Authentication, ID, and Signature. Either of these certificates will work in the system, however, choosing Authentication is preferred.

12. Click **OK**.
